

Privacy Policy

Effective Date: 05-05-2025

Welcome to InterviewScreener.com (“we,” “our,” “us”). Your privacy is important to us. This Privacy Policy explains how we collect, use, disclose, and safeguard your personal data when you visit or use our website, products, and services (collectively, the “Platform”).

1. Information We Collect

a. Information You Provide

- Full name, email address, contact number
- Resume/CV, professional experience, education details
- Voice/video recordings during AI interviews
- Responses to screening questions and assessments

b. Automatically Collected Data

- IP address, browser type, device information
- Usage data, such as pages visited and features used

c. Third-Party Integrations

- If you apply via LinkedIn or other integrated services, we may receive relevant profile information with your permission.

2. How We Use Your Information

- Screen and evaluate job candidates using AI
- Match candidate profiles with relevant job openings
- Communicate interview results to candidates and employers
- Improve and personalize our services
- Comply with legal obligations and prevent fraud

3. Data Sharing

- We do not sell your data. We may share data with:
- Employers or recruiters evaluating candidates
- Technology providers assisting in AI analysis and storage
- Legal or regulatory bodies as required

All third parties are bound by confidentiality and data protection agreements.

4. Data Security

We implement appropriate technical and organizational measures to protect your data, including:

- End-to-end encryption of interview content
- Access controls and secure cloud infrastructure
- Regular data audits and vulnerability assessments

5. Data Retention

We retain your data for as long as necessary to fulfill the purpose it was collected for, or as required by law. You may request data deletion at any time.

6. Your Rights

Depending on your location, you may have the right to:

- Access or correct your personal data
- Request deletion or restriction of processing
- Object to data use
